

## Help us protect lands and waters!

It has been said that there are four things that once done cannot be brought back or undone—the spent arrow, the spoken word, neglected opportunities, and time past. To that list, I do think there are more to add – the extinction of a species, chemically polluted land and water, developed and fragmented habitat, and introduction of invasive species. These last four are all the “things” that Northwoods Alliance, Inc. works toward preventing.

In 2016, Northwoods Alliance launched its Community Forest and Habitat Conservation Program. After 10 years under new and stable leadership, the organization felt its long-term future must include ownership of unique property to offer positive, tangible, and hands-on examples of the value of conserving healthy, intact habitats. Our land conservation initiatives have helped protect the Pilgrim River Forest which includes 1600 acres of land and 3.5 miles of the Pilgrim River and the 1042 acre Upper Wisconsin River Legacy forest along with other significant successes. We have also developed a Water Resource Program focusing on maintaining pristine north woods waters.

Our primary focus currently is the conservation of the 160-acre Wildcat Falls Community Forest project. With this effort we hope to keep Wildcat Falls and the diverse, unique habitats forever wild and open to the public. Here riparian features with waterfalls, as well as rock outcrops and old growth forest house incredible plant and animal diversity only 9 miles from Watersmeet, MI.

Northwoods Alliance needs caring and committed individuals to financially support these projects to prevent the loss and damage to beautiful habitats and their waters and wildlife. We hope you will join us and support us. All donations are dedicated to our projects.

***“When we see land as a community to which we belong, we may begin to use it with love and respect.” Aldo Leopold***

I want to help support Northwoods Alliance in their work to make Wildcat Falls Community Forest a reality by donating:
